- Supported and created email marketing campaigns with Mail Chimp.
- Created all marketing material, and mailers to help bring in new customers with special discount cards.

## Projects

### Portfolio Site

🔗 robertdev.tech

Materialize CSS, HTML5, CSS3, JavaScript  
Partical.js.

### koreybrown.com

🔗 koreybrown.com

React, Gatsby.js, HTML5, CSS3, JavaScript.

### Responsive Web Form

🔗 codingandcoffee

HTML5, CSS3, Bootstrap 4 Beta, Font  
Awesome, Firebase.

## Side Projects

### UrlTracker

I am currently building a full stack web application with React, Express, and Mongo. URL tracker will allow developers to organize all of the sites they use for learning and development without having to always email a link to yourself.

### Created a Github Pull Request Tutorial

This tutorial will help people new to GitHub and new to git make their first pull request without messing up any master branches.

### OpenSource Project: snapcloud.io

Worked on the Front End, and created some of the Angular components.
